Way of Life!

ABS

ABS* (Anti-lock brake system), a supplemental system, which automatically controls the braking force efficiently & avoids wheel lock up due to slippery road, sudden change of road conditions or excessive braking in a certain controllable range. Please do not overly rely on ABS.

FI FUEL INJECTION

GIXXER SF comes with advanced Fuel Injection Technology equipped with 6 sensors to calculate the optimum amount of fuel to be injected for better combustion efficiency, thereby improving fuel efficiency and providing accurate throttle response at all rpm to make your every ride even more exciting.

POWERED BY SEP SUZUKI ECO PERFORMANCE

SEP (Suzuki Eco Performance) is a developmental concept proposed by Suzuki. At Suzuki, we pay great attention to riding performance, and 'SEP' stands for our next-generation engine that offers both low fuel consumption and superior acceleration.

Specifications, appearances, equipments, colours, materials and other items of the Suzuki product shown in this leaflet are subject to change by manufacturers at any time without notice and they may vary depending upon local conditions and requirements. Please visit your local dealer for details of any changes. Actual body colour may differ from the colours in this leaflet. *ABS is not designed to shorten the braking distance. ABS cannot prevent wheel skidding caused by braking while cornering. Please ride carefully and do not overly rely on ABS.
